

Assistive Technology Program

Our Assistive Technology Program at **Dignity Health Physical Therapy Horizon Ridge** provides individuals and caregivers hands-on education and training for enabling devices.

One of the most popular assistive devices is the wheelchair, with approximately 2.7 million wheelchair users in the U.S. alone. Patients who use wheelchairs that are too small, old or not appropriate for their conditions lose independence and quality of life.

Dignity Health[®]
Physical Therapy

in partnership with Select Medical

Assistive Technology Program

Our team of occupational, physical and speech therapists – along with neurological specialists – will assess your needs, conditions and abilities to determine the best type of assistive device that improves your quality of life, including:

- Powered or manual wheelchair
- Powered scooter
- Speech-generating technology
- Electronic Aids for Daily Living (which enable people with disabilities to have more control over home and work environments)

We coordinate with a certified Assistive Technology Professional to conduct comprehensive device evaluations, including:

- Wheelchair fittings, adjustments and practice sessions – even when new equipment is delivered
- Seating measurements and pressure-mapping assessments
- Positioning for specialized wheelchairs (ultra-lightweight, bariatric and tilt-in-space)
- Propulsion analysis
- Speech-generating device training
- Additional options are available for other Electronic Aids For Daily Living

If you require the needs of an assistive device, speak to your physician or one of our team members about your potential needs.
